

WPS EVAC BUILDING APP

Delivering Your Building's Vital Plans Directly
to the People Who Matter Most

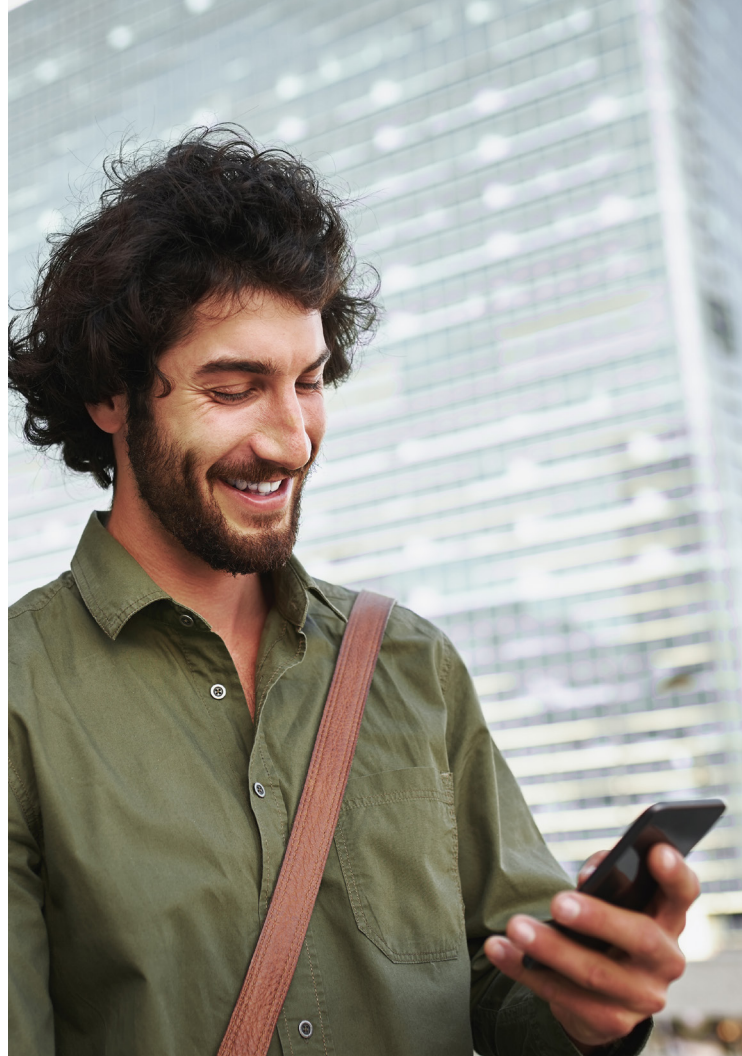

LIFE SAFETY AT YOUR FINGERTIPS

Building emergency personnel and occupants rarely devote the time and commitment required to read their emergency plan manuals or participate in necessary training and drills.

This is why WPS has made this information more accessible and concise. By using our cutting edge technology, we have created an app that puts the safety of your building at your fingertips.

The app features:

- Life saving features
- Automatic updates to enhance accuracy and reliability
- One touch evacuation check-in
- Alert reporting
- Emergency SMS mass notification

TRIED AND TRUE EMERGENCY PLANS, TRAINING AND SOFTWARE

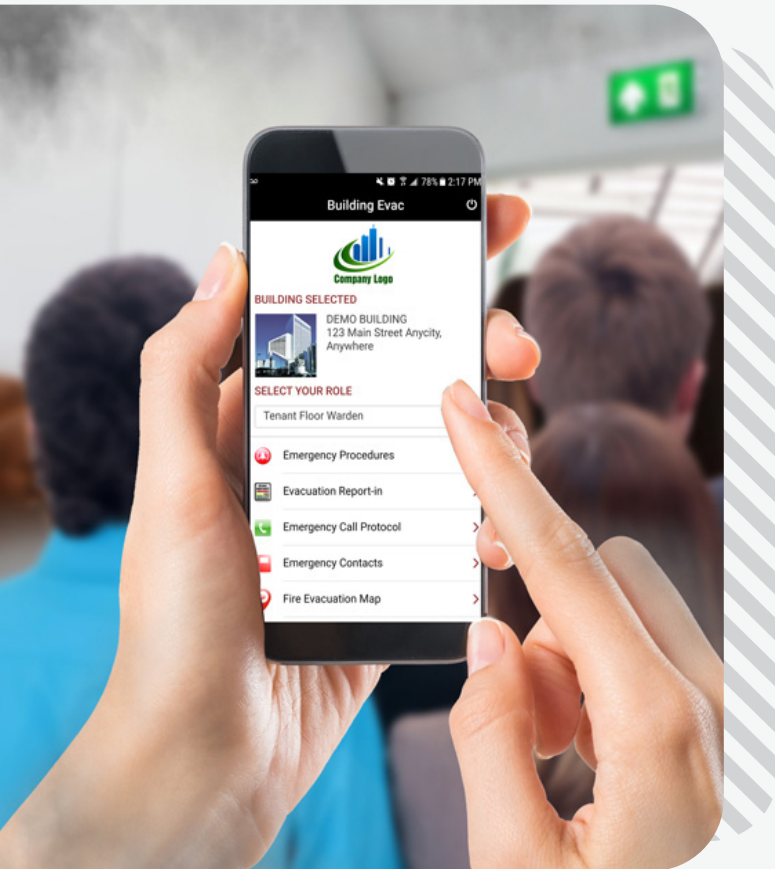

Property owners and managers are constantly facing new challenges that can increase liability risks. Some of these challenges include: a lack of or no emergency plans, old and ineffective equipment and improper emergency training protocols.

WPS provides increased safety, with improved accessibility to resources, for all parties involved.

SAFETY FIRST

Our mission is to enhance the life safety of building occupants by empowering the “true” first responders.

- 40 years of service in the fire and life-saving industry
- End-to-end support for all of our services
- Best in class emergency plans, training and software
- Proven track record for reducing liability and saving lives
- Reduce liability and save lives

THE WPS DIFFERENCE

WPS has been in business for more than four decades.

Over this time, we have developed effective fire and life safety planning products and proprietary software solutions for building owners and property management companies.

Our building fire and life safety solutions are implemented in thousands of buildings across Canada and the United States.

We provide complete solutions for commercial offices, multi-housing residential complexes, light industrial buildings, shopping malls, schools, care facilities, and more.

WPS EVAC BUILDING APP BENEFITS

The WPS Evac App makes your building's emergency plan more accessible, practical and effective.

Automatically syncs new building data

Customized access for building staff, tenants and occupants

A built-in and simple to use emergency broadcast system

Access to emergency procedures and evacuation

Instant evacuation status report delivered direct to building management

View on-demand emergency training direct through the app

FIRE RESPONSE PLANNING

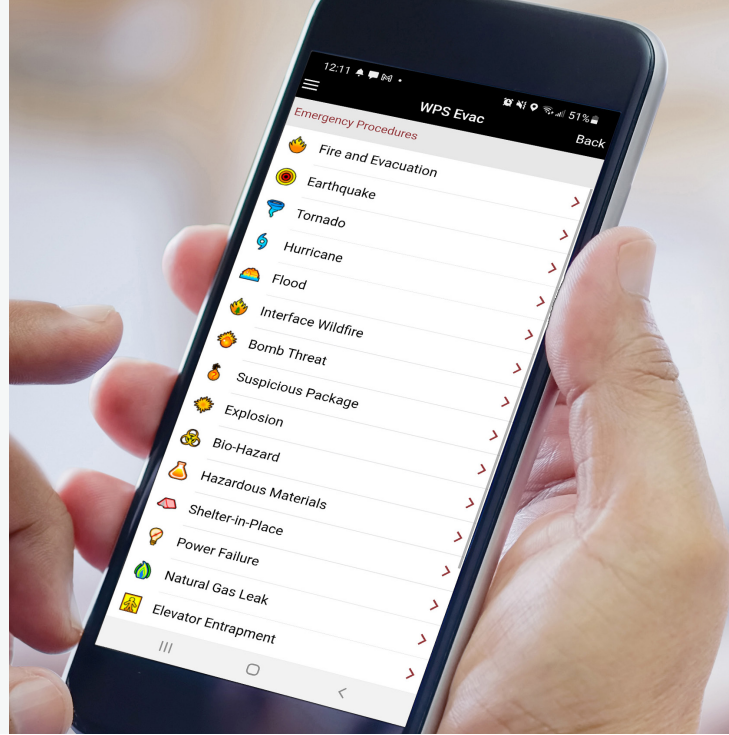

A building is not compliant or protected simply because it has a fire safety plan.

The WPS Evac Building App utilizes our trusted software to host developed fire safety plans based on regional fire code requirements to ensure compliance with all applicable standards. The app also prioritizes preparation and readiness assurance for building occupants.

MULTI-HAZARD EMERGENCY PLAN

Today, you must be prepared and plan for other potential threats beyond a building fire. The WPS Evac Building App provides comprehensive multi-hazard emergency plan information for all types of buildings.

Fire is just one of the many threats a commercial or residential building can face. It is important to be prepared for other potential threats, including earthquakes, floods, hurricanes, and human-related hazards like active shooters or bomb threats.

ALL-IN-ONE APP

The WPS Evac all-in-one Building App provides peace of mind to property managers without breaking the bank.

Emergency Procedures

Evacuation Reports
