Disaster Management Solutions

WPS EVAC SOFTWARE AND MOBILE APP

WPS Evac software and mobile app is a custom-built proprietary building fire and life safety solution that is designed to enhance safety protocols for tenants and minimize liability-related risks for property owners.

Our Evac Software also simplifies compliance with regulatory codes and standards, reduces time spent managing emergency plans, and helps keep tenants safe.

ACCESSIBLE RESOURCES AT ALL LEVELS

CORPORATE

Empower national and senior management to make informed decisions about disaster management.

MANAGERS

Give property managers building-specific resources to keep tenants and building occupants safe.

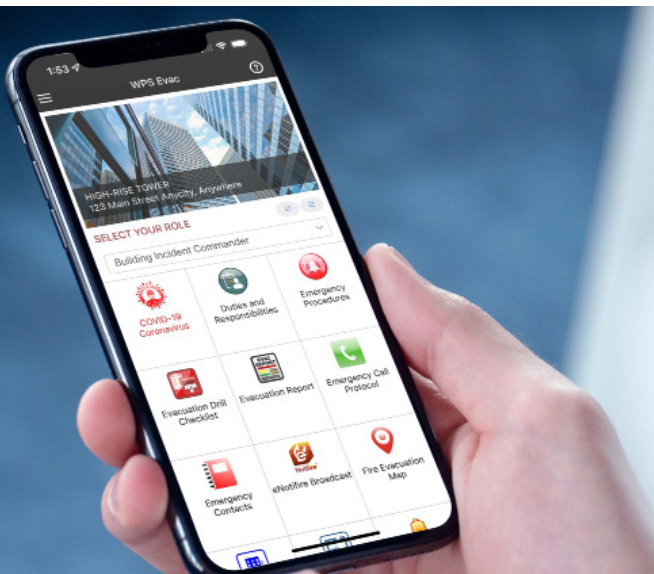

TENANTS

Ensure tenants are kept safe and informed before, during, and after emergencies.

OCCUPANTS

Empower your occupants with vital emergency procedure information to ensure their safety.

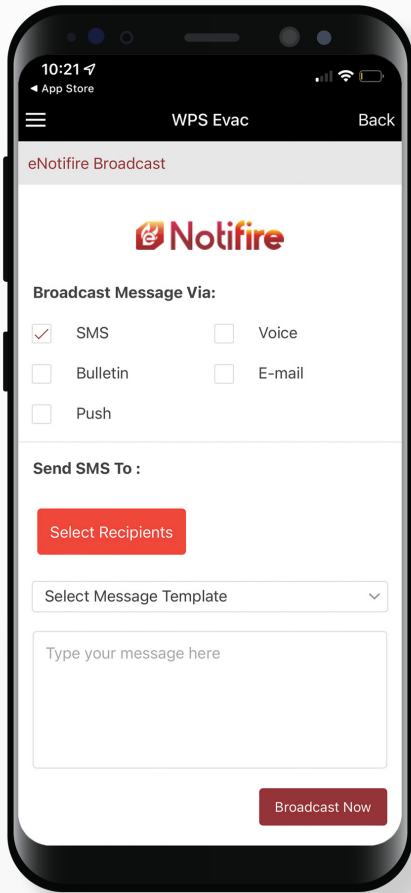

WPS EVAC MOBILE APP

The WPS Evac Mobile App is life safety in the palm of your hand. With step-by-step emergency procedures only a touch away, the WPS Evac Mobile App helps to keep all parties involved protected and safe during emergencies.

THE ULTIMATE IN FIRE AND LIFE SAFETY TECHNOLOGY

WPS EVAC SOFTWARE EMERGENCY BROADCAST SYSTEM

Communication is critical during emergencies. Whether you are mobilizing building staff, informing tenants about a developing situation, or notifying employees of an emergency, WPS Evac Software enables you to send life-saving instructions using email, SMS, and voice messages. Our mobile app consists of numerous key features that provide increased levels of efficiency and effectiveness during emergency situations:

Conveniently initiate and deliver emergency messages directly from the app.

Select from a collection of template messages - saving time and eliminating stress.

Select from a pre-defined group that you would like to deliver the message to.

Confirm occupant status using our built-in 'roll call' feature.

WPS EVAC SOFTWARE

Tech-based software that facilitates fire and life safety compliance, keeps tenants safe during emergencies, and reduces liability risks related to fires and other accidents.
