# STAY UP TO CODE WITH WPS

WPS Disaster Management Solutions provides emergency training and planning, as well as building-customized emergency response software, that keeps fire and life safety plans compliant with jurisdictional code requirements.

## THE RISKS OF NOT MEETING CODE REQUIREMENTS

Injury to building occupants

Hefty legal punishments, including jail time

Avoidable property damage during an emergency

Unsafe evacuation procedures

OPTIMIZED TO MEET LATEST CODE REQUIREMENTS

Property managers may not have the time to consistently inspect whether their emergency plans are up to code.

For that reason, WPS consults with local authorities, provides end-to-end support for all emergency-response services, and utilizes over 40 years of experience to ensure that you will never have to worry about your buildings not being up-to-code again.

THE WPS EDGE

WPS provides emergency planning, training and customizable tech-based solutions that are optimized toward reducing liability risks and meeting code requirements.

HOW WPS KEEPS YOUR PLANS UP-TO-CODE

Our fire-safety and multi-hazard plans are customized according to your building requirements and are submitted to your local jurisdiction to ensure they are up to code.

Our experienced trainers provide code-required fire safety programs using online, on-site and on-demand formats.

Our software streamlines your emergency planning process and can digitally update all outdated plans, making sure everyone has access to the most recent, up-to-code information.
